To whom it may concern
In reference to Libratech and Penny Gromatzky

I have been privileged to have worked with Penny and Libratech for a number of years and have never not been entirely pleased and delighted with the outcomes!

Penny is an extremely talented lady and has a remarkable group to work with.

Her professional talents, planning skills and creativity, have allowed me, and those I have referred her to, to have remarkable and efficient library facilities.
I have seen her work from scratch, take an existing plan to improve it and even take a disaster and save it!

Penny truly understands libraries, their users and their staff. This depth of knowledge that she has achieved gives a broad perspective and wealth of creativity to her projects.

She can also work with a broad range of budgets. I currently am working with Penny on a Child Care Group of Dallas Library redo, which has an extremely low budget. This fact did not deter Penny and she is helping us get a great project with very minor dollars.

I am attaching a reference that I provided in 2015 which was the Robert Hyer Library redo that had a much larger budget. I feel Penny has approached both of these projects with the same creativity and enthusiasm.

I feel any group choosing to work with Penny and Libra Tech will be fortunate and I will eagerly look forward to seeing the exciting outcomes.
I would be delighted to speak to anyone with questions about this great Library Group!!
